MOHAMED AASIK

IT professional and educator

aasikcs@gmail.com 077 - 5082 936 Aasik Muththalif

SUMMARY

IT professional and educator with 5+ years of experience across infrastructure operations, technical support, and academic instruction. Proven ability to manage incidents, support enterprise applications, and administer systems in fast-paced environments. Passionate about bridging industry practice with academic learning, with hands-on experience delivering university-level courses in OOP, AI/ML, and System Analysis. Currently pursuing an MSc in Information Technology at University of Moratuwa, with research interests in Generative AI, NLP, and Cloud Computing.

PROFESSIONAL EXPERIENCE

Lecturer (Probationary) & Industrial Linkage Coordinator, *ICST University Park* 01/2025 – Present

- Delivered lectures on System Analysis and Design and Object-Oriented Programming and Artificial Intelligence and Machine Learning.
- Developed comprehensive session plans and lesson plans to support effective teaching.
- Designed, prepared, and evaluated examination papers to assess student learning outcomes.
- Organized activities, workshops, and training sessions to prepare students for industry requirements.

IT Instructor, *ICST University Park* 10/2024 – 08/01/2025

- Conducted practicals for Web Technology and Object Oriented Programming
- Guided students for their project works
- Shared industry best practices and real-world scenario to make the lessons more practical

TechOps Engineer, *Aexis Medical* 12/2023 – 10/2024

- Taking ownership of Aexis software technical issues,
- Diagnosed and escalated software defects, reducing resolution time through cross-team coordination.
- Follow up the tickets according to the priority set by first-line support team
- Maintaining and managing product versions
- Maintain local databases (MSSQL, Oracle) for testing purposes
- Supported timely patch deployments and version releases, maintaining product stability

Associate Software Engineer - Infrastructure Operations, *Virtusa* 03/2022 – 12/2023

- Work as a system support engineer for BT outsourced by Virtusa and Handling tickets receive via NG autofix, Service Now, ORNG autofix portals.
- Resolved P1/P2 critical incidents within SLA, ensuring minimal service disruption
- Monitored application performance and provided proactive technical support to ensure system stability.
- Served as point of contact for end users, engineers, and operations teams during incident resolution
- Notifying and Escalating Issues to appropriate teams.
- Consistently met SLA targets by prioritizing and resolving tickets within defined timeframes.

ICT Tutor, *Mayfair English School, Wahakota, Galewala* 03/2021 – 03/2022
- Conducted classes for ICT (National Syllabus) for O/L and A/L Students
- Conducted classes for Edexcel ICT for O/L and A/L Students

ICT Tutor, *Private IT Tutor* 07/2019 – 03/2022
- Conducted classes for ICT (National Syllabus) for O/L and A/L Students
- Conducted classes for Edexcel ICT for O/L and A/L Students

Intern - QA - Automation, *Virtusa* 07/2018 – 03/2019
- Develop, execute, and debug automated functional tests for Workday applications.
- Implement tests based on QA test design Experienced in Manual and Automated testing with tools such as Selenium WebDriver, HP Quick Test Professional and Junit/TestNG.

EDUCATION

MSc In Information Technology (R), *University Of Moratuwa* 2025 – Present

BSc(Hons) in Computer Science & Technology, *Uva Wellassa University* 2015 – 2019

TECHNICAL SKILLS

- SQL
- Technical Writing
- Confluence
- Azure
- ITIL
- Project Management
- SVN
- MySQL
- Shell Scripting
- Linux
- Troubleshooting skills
- Java
- CI/CD
- Teaching and Learning
- Jira
- Software Testing

AREAS OF INTEREST

- Natural Language Processing
- Generative AI
- Explainable AI (XAI)
- Cloud Computing
- Cyber Security
- Software Quality Assurance

RESEARCH PROJECT

Ontological framework for healthcare system in Sri Lanka
- Developed an ontological framework for Sri Lanka's healthcare system as a final year project, using OOAD concepts to automate and streamline complex workflow processes. Built a system prototype that integrates ontological modeling with object-oriented methodologies to improve efficiency, accuracy, and scalability in healthcare operations.
